BIOMETRIKA

FOUNDED BY

W. F. R. WELDON, FRANCIS GALTON AND KARL PEARSON

MANAGING EDITOR

E. S. PEARSON

ASSOCIATE EDITORS

M. G. KENDALL JOHN WISHART

in consultation with

HARALD CRAMÉR R. C. GEARY

J. B. S. HALDANE

VOLUME 38

1951

ISSUED BY

THE BIOMETRIKA OFFICE, UNIVERSITY COLLEGE, LONDON

PRINTED AT THE UNIVERSITY PRESS, CAMBRIDGE

PRINTED IN GREAT BRITAIN

CONTENTS OF VOLUME 38

Memoirs

		PAGES
I.	Major Greenwood, with Frontispiece	1—3
II.	Tables of the 5 % and 0·5 % points of Pearson curves (with argument β_1 and β_2) expressed in standard measure. By E. S. Pearson and Maxine Merrington. With one Figure in the Text	4—10
III.	Regression, structure and functional relationship. Part I. By M. G. Kendall	11—25
IV.	Partial and multiple rank correlation. By P. A. P. Moran	26—32
V.	An application of the distribution of the ranking concordance coefficient. By A. Stuart	33—42
VI.	The effect of non-normality on the power function of the F-test in the analysis of variance. By F. N. David and N. L. Johnson	43—57
VII.	Efficiency of the method of moments and the Gram-Charlier Type A distribution. By L. R. Shenton. With one Figure in the Text	58—73
VIII.	On distributions for which the Hartley-Khamis solution of the moment-problem is exact. By H. P. Mulholland	74—89
IX.	Estimation problems when a simple type of heterogeneity is present in the sample. By W. M. Long	90—101
X.	Some tests for randomness in plant populations. By Marjorie Thomas. With three Figures in the Text	102—111
XI.	Charts of the power function for analysis of variance tests, derived from the non-central F-distribution. By E. S. Pearson and H. O. Hartley. With eight Figures in the Text	112—130
XII.	Some questions of distribution in the theory of rank correlation. By S. T. David, M. G. Kendall and A. Stuart	131—140
XIII.	Note on an exact treatment of contingency, goodness of fit and other problems of significance. By G. H. Freeman and J. H. Halton	141—149
XIV.	The geometry of estimation. By J. Durbin and M. G. Kendall. With two Figures in the Text	150—158
XV.	Testing for serial correlation in least squares regression. II. By J. Durbin and G. S. Watson. With one Figure in the Text	159—178
XVI.	Bi-variate k-statistics and cumulants of their joint sampling distribution. By M. B. Cook	179—195
XVII.	Random dispersal in theoretical populations. By J. G. Skellam. With four Figures in the Text	196—218

PAGES

XVIII. The frequency distribution of the product-moment correlation coefficient in random samples of any size drawn from non-normal universes. By A. K. GAYEN. With two Figures in the Text . 219—247

XIX. *Biometrika*, 1901–1951. By W. P. ELDERTON . . . . . 267—268

XX. The estimation of population parameters from data obtained by means of the capture-recapture method. I. The maximum likelihood equations for estimating the death-rate. By P. H. LESLIE and DENNIS CHITTY . . . . . 269—292

XXI. On estimating the size of mobile populations from recapture data. By NORMAN T. J. BAILEY . . . . . 293—306

XXII. A mathematical theory of animal trapping. By P. A. P. MORAN . 307—311

XXIII. Some systematic experimental designs. By D. R. COX . . . 312—323

XXIV. The comparison of several groups of observations when the ratios of the population variances are unknown. By G. S. JAMES . 324—329

XXV. On the comparison of several mean values: an alternative approach. By B. L. WELCH . . . . . 330—336

XXVI. The effect of standardization on an approximation in factor analysis. By M. S. BARTLETT . . . . . 337—344

XXVII. The Jacobians of certain matrix transformations useful in multivariate analysis. Based on lectures of P. L. Hsu at the University of North Carolina, 1947. By WALTER L. DEEMER and INGRAM OLKIN . . . . . 345—367

XXVIII. Two applications of bivariate k-statistics. By M. B. COOK . . 368—376

XXIX. Interrelations between certain linear systematic statistics of samples from any continuous population. By G. P. SILLITTO . . 377—382

XXX. The delay to pedestrians crossing a road. By J. C. TANNER. With four Figures in the Text . . . . . 383—392

XXXI. Further applications of range to the analysis of variance. By H. A. DAVID . . . . . 393—409

XXXII. The fitting of polynomials to equidistant data with missing values. By H. O. HARTLEY . . . . . 410—413

XXXIII. Truncated lognormal distributions. I. Solution by moments. By H. R. THOMPSON . . . . . 414—422

XXXIV. A chart for the incomplete beta-function and the cumulative binomial distribution. By H. O. HARTLEY and E. R. FITCH. With ruler scales in pocket at end of volume . . . . . 423—426

XXXV. The expected frequencies in a sample of an animal population in which the abundances of species are log-normally distributed. By P. M. GRUNDY. With one Figure in the Text . . . 427—434

XXXVI. Tables of symmetric functions. Parts II and III. By F. N. DAVID and M. G. KENDALL . . . . . 435—462

Miscellanea

PAGES

(i) Some observations on the practical aspects of weighing designs. By K. S. BANERJEE . . . . . 248—251

(ii) Test for the significance of the difference between means in two normal populations having unequal variances. By D. G. C. GRONOW . . . . . 252—256

(iii) Review of R. A. FISHER's *Contributions to Mathematical Statistics*. By E. S. PEARSON . . . . . 257—259

(iv) Review of W. FELLER's *Probability Theory and its Applications*, vol. I. By P. A. P. MORAN. . . . . 259—260

(v) Review of WILLIAM C. COCHRAN and GERTRUDE M. COX's *Experimental Designs*. By N. L. JOHNSON . . . . . 260—261

(vi) Review of H. B. MANN's *Analysis and Design of Experiments*. By N. L. JOHNSON . . . . . 260—261

(vii) Review of J. NEYMAN's *First Course in Probability and Statistics*. By E. S. PEARSON . . . . . 261—262

(viii) Review of F. YATES's *Sampling Methods for Censuses and Surveys*. By C. A. B. SMITH . . . . . 262—263

(ix) Review of *Symposium on Stochastic Processes*. By P. WHITTLE . 263—265

(x) Moment constants for the distribution of range in normal samples. By H. O. HARTLEY and E. S. PEARSON . . . . . 463—464

(xi) Rapid methods for estimating correlation coefficients. By L. N. CHOWN and P. A. P. MORAN . . . . . 464—467

(xii) Mean and variance of an entry in a contingency table. By W. L. STEVENS . . . . . 468—470

(xiii) The Wishart distribution derived by solving simultaneous linear differential equations. By H. S. STEYN . . . . . 470—472

(xiv) Quality control systems based on inaccurately measured variables. By W. M. LONG. With two Figures in the Text . . . . 472—475

(xv) The bivariate normal integral. By J. H. CADWELL. With four Figures in the Text . . . . . 475—479

(xvi) Note on the variate differences of autoregressive series. By BENTO MURTEIRA . . . . . 479—480

(xvii) Note on the inversion theorem. By J. GIL-PELAEZ . . . . 481—482

(xviii) A note on the statistical independence of quadratic forms in the analysis of variance. By J. A. NELDER . . . . . 482—483

(xix) Review of N. L. JOHNSON and H. TETLEY's *Statistics*, vol. II. By R. E. BEARD . . . . . 484—485

(xx) Review of I. J. GOOD's *Probability and the Weighing of Evidence*. By F. N. DAVID 485
